

Vincent Gabriel

Senior Software Developer at Landmark Network

vadimg88@gmail.com

Summary

Open Source Contributions:

<https://github.com/VinceG>

Results-oriented lead architect with a focus on delivering high-quality code and products in high traffic environments. Enthusiastic about building new products and services. Proven leadership ability; capable of keeping a team focused on the tasks and deadlines at hand. Solves immediate crises with solutions that will fit for the long-term.

Over seven years of experience in the Internet industry, specializes in LAMP technologies. Hands-on experience with all aspects of building large-scale, high-availability applications — application development, n-tier architecture, frameworks, data interchange, security, online commerce, database administration, replication, and optimization, server administration, open source software, and quality assurance. Stays up to date with best practices.

Interests

I'm the guy who

- * is a seasoned PHPer.
 - * gets things done that you didn't think would get done
 - * tackles new problems daily
 - * takes to new technologies like a duck to water
 - * you wish you'd had on board for your last project that never quite worked like you needed it to
 - * you were looking for earlier, before you settled for your last guy
 - * comes up with a new approach to a problem that you hadn't thought of before, but that your users love
-
